

Role: Assistant Editor & Community Engagement Officer | **Application Target:**

jobs@campbellcollaboration.org

File / Subject Naming: Mario, Marcolongo, Assistant Editor & Community Engagement Officer | **Deadline:** Tuesday, 14 July 2026

Subject: Application: Mario, Marcolongo, Assistant Editor & Community Engagement Officer

Dear Campbell Collaboration Selection Committee and Editor-in-Chief,

Nine years of auditable Wikimedia edits (4,317 verified contributions) that hold up under continuous public scrutiny. A personal 41x whole genome released to the public domain under an ENA accession number. An open science registry (*Yourself to Science™*) cataloging 55+ research studies and cited across 37 Wikidata entities. Formal Cochrane & GALENOS certification in systematic evidence synthesis.

I am writing to apply for the **Assistant Editor & Community Engagement Officer** role. Campbell's mission—ensuring global public policy and social science are driven by rigorous, accessible evidence synthesis—directly aligns with my nine-year track record at the intersection of **evidence verification, editorial workflow acceleration, empathetic community facilitation, and AI-native automation**.

Over the past decade, I have operated across three pillars that map directly to the responsibilities of your coordinating groups (Ageing, Children and Young Persons Wellbeing, Disability, Education, and Social Welfare):

1. Supporting Editorial Velocity & Rigorous Evidence Verification

I have contributed **4,317 auditable scientific, structured data, and media edits across Wikimedia projects** (1,592 English Wikipedia, 1,249 Wikidata, 752 Italian Wikipedia, 684 Wikimedia Commons) that hold up under continuous community scrutiny, alongside completing formal **Cochrane Crowd and GALENOS Evidence Synthesis certification**. At *Entropy for Life*—one of Italy's premier science communication ecosystems (480,000+ community across YouTube, Instagram, and TikTok)—I serve as technical operations and literature researcher, fact-checking primary literature across **55+ YouTube videos (long & short)**, co-authoring **4 articles**, creating empirical data visualizations and Reels, and earning formal acknowledgment in Giacomo Moro Mauretto's Mondadori bestseller *Italiani Veri* (Mondadori is Italy's largest trade publishing house). I understand what it takes to recruit peer reviewers, distribute editorial workloads, and maintain uncompromising epistemic precision while overseeing high-volume publication schedules.

2. Experimenting with AI to Make Evidence Synthesis Faster and Better

Campbell explicitly seeks someone excited about experimenting with AI to achieve more. As an AI-native engineer, I build production systems that automate literature workflows and open science infrastructure. I founded **Yourself to Science™** (yourselftoscience.org), an open CC0 directory normalizing 55+ clinical trials and biobanking registries under FAIRsharing data

standards, complete with a live Model Context Protocol (MCP) server. I also architected computational bioinformatic pipelines (including a 41x Whole Genome Sequencing pipeline where both raw BAM alignments and VCF variant call files are rigorously aligned to the GRCh38 reference genome), while continuously tracking frontier AI benchmarks (ArtificialAnalysis.ai, LiveBench) to optimize token efficiency, context windows, and prompt security against injection vulnerabilities. I do not treat AI as a replacement for human editorial judgment, but as a force multiplier for literature screening, structured data extraction, and quality control.

3. **Cognitive Empathy, Community Engagement & Bridging Epistemic Rigor with Public Comprehension**

Supporting a global "community of communities" requires nuanced interpersonal communication and psychological safety. Bringing lived neurodivergent experience (Autism Spectrum), I volunteered as an independent researcher at the University of Padua (Department of Developmental Psychology and Socialisation) to co-facilitate remote Zoom clinical study focus groups under the instruction and study protocols of Prof. Marta Panzeri (including peer simulation training). This hands-on experience trained me to design reproducible facilitation scripts, build deep rapport, and navigate neurodivergent communication across diverse stakeholders. At *Entropy for Life*, I balanced rigorous scientific evidence with accessible public engagement and sponsor relationships, including institutional collaborations with **AIRC (Italian Foundation for Cancer Research)** and broadcast appearances on **RAI Public Television**.

I am accustomed to remote collaboration across international time zones, managing overlapping deadlines independently, and troubleshooting complex editorial and technical workflows. I would welcome the opportunity to support your coordinating groups and help make Campbell's evidence synthesis faster, more affordable, and globally impactful.

Thank you for your time, consideration, and dedication to open evidence synthesis.

Warm regards,

Mario Marcolongo

Location: Italy (Remote / Global Availability during GMT business hours 09:00–17:00)

Email: me@mariomarcolongo.com

MARIO MARCOLONGO

Assistant Editor & Community Engagement Officer Candidate | Evidence Synthesis & AI-Native Systems Builder

Remote (Italy) · Open to Global GMT Working Hours (09:00–17:00)

me@mariomarcolong.com · mariomarcolong.com · ORCID: 0000-0003-2846-7115

EXECUTIVE PROFILE

Evidence synthesis specialist, AI-native systems builder, and scientific literature researcher with 9+ years of experience verifying biomedical evidence, accelerating editorial workflows, and bridging epistemic rigor with public comprehension. Certified in **Cochrane Crowd & GALENOS Evidence Synthesis methodologies** and author of **4,317 auditable contributions across Wikimedia projects** (English & Italian Wikipedia, Wikidata, Wikimedia Commons).

At **Entropy for Life**, manages technical operations and fact-checks primary literature across 55+ documentary videos and 4 articles for a **480,000+ cross-platform community** (formally acknowledged in Mondadori bestseller *Italiani Veri*). Founder of **Yourself to Science™** (open citizen science directory with FAIRsharing & live MCP Server). Experienced in co-facilitating recorded remote **Zoom clinical study focus groups** with neurodivergent participants at the **University of Padua (Department of Developmental Psychology and Socialisation)** under Prof. Marta Panzeri.

CORE COMPATIBILITY WITH CAMPBELL COLLABORATION

- **Editorial Coordination & Peer Review Workflow:** Proven track record verifying 55+ YouTube videos & co-authoring 4 articles at *Entropy for Life*; certified in Cochrane/GALENOS systematic review screening.
- **AI Engineering & Workflow Automation:** Architected live MCP Servers, automated scientific link converters, FAIR metadata registries (*Yourself to Science™*), and computational genomic pipelines (41x WGS with GRCh38-aligned BAM & VCF). Continuously tracks frontier benchmarks (ArtificialAnalysis.ai, LiveBench) to optimize token efficiency, latency, context windows, and prompt security against injection vulnerabilities.
- **Global Community Engagement & Bridging Epistemic Rigor with Public Comprehension:** Co-facilitated remote Zoom clinical study focus groups at University of Padua under Prof. Marta Panzeri; managed audience engagement and institutional sponsors (AIRC Foundation & RAI Public TV) across a 480K+ audience.
- **Advanced English & Multilingual Synthesis:** C1 Advanced Professional Proficiency (EF SET 68/100); Native Italian.

RELEVANT EXPERIENCE

Technical Operations, Scriptwriter & Editorial Specialist

Jun 2023 — Present

Entropy for Life (entropyforlife.it)

- Verified primary biomedical literature across **55+ YouTube content pieces (long-form documentaries and shorts)**, co-authored **4 articles**, and created data visualizations & Instagram Reels for a 480,000+ audience (36.2M+ views).
- Formally acknowledged in Giacomo Moro Mauretti's Mondadori bestseller "*Italiani Veri*" as a trusted primary literature researcher and scientific fact-checker (Mondadori is Italy's largest trade publishing house).
- Configured and managed web infrastructure on OVHCloud (entropyforlife.it , event pages, email communications, SSL/DNS) supporting institutional initiatives with **AIRC (Italian Foundation for Cancer Research)** and broadcast appearances on **RAI Public Television**.
- Designed high-CTR YouTube thumbnails and titles using structured A/B testing strategies while balancing strict scientific rigor with public accessibility and sponsor alignment.

Founder & Lead Builder

Aug 2024 — Present

Yourself to Science™ (yourselftoscience.org)

- Founded and architected an open-access (CC0 / AGPL-3.0) citizen science directory cataloging **55+ clinical trials, biobanking registries, and multi-modal studies**.
- Integrated AI-native evidence infrastructure: Semantic Linked Data (JSON-LD, RDF Turtle), FAIRsharing indexing ([doi:10.25504/FAIRsharing.d3d487](https://doi.org/10.25504/FAIRsharing.d3d487)), Zenodo archiving, and a live Model Context Protocol (MCP) server for automated query resolution.

Scientific Editor & Biomedical Curation Specialist

2017 — Present

Wikimedia Foundation (English & Italian Wikipedia, Wikidata, Wikimedia Commons)

- Authored **4,317 auditable contributions across Wikimedia projects** (1,592 English Wikipedia, 1,249 Wikidata, 752 Italian Wikipedia, 684 Wikimedia Commons), specializing in genetics, epidemiology, and medical literature under public CentralAuth identity ([Digressivo](#)).
- Created open-access scientific vector diagrams (e.g., monogenic brain disorder Euler diagrams, comparative epidemiological charts) adopted across international Wikipedia editions.

Volunteer Clinical Research Facilitator & Focus Group Conductor

Nov 2022 — Present

University of Padua — Department of Developmental Psychology and Socialisation

- Contributed as an independent volunteer researcher to a clinical study on sexuality in the autism spectrum led by Prof. Marta Panzeri, demonstrating strong intrinsic dedication, ethical sensitivity, and empathetic rapport-building with neurodivergent participants enriched by lived neurodivergent perspective (Autism Spectrum).
- Developed the standardized facilitation guide for remote video focus groups—undergoing peer simulation training and following detailed session scripts and behavioral facilitation protocols instructed by Prof. Marta Panzeri to ensure rigorous, reproducible execution.
- Managed end-to-end participant recruitment workflows, including crafting and executing the call for candidates across neurodivergent communities.

- Conducted thorough primary bibliographic searches, scientific literature verification, and qualitative evidence synthesis to support study design and protocol development.
- Served as both primary conductor and co-conductor for recorded remote Zoom focus groups—establishing deep psychological safety while managing all remote video and technical session infrastructure to elicit rich qualitative data.

Citizen Scientist Open Genomic Donor & Bioinformatician

2026

European Nucleotide Archive (ENA PRJEB109744 / SAMEA121950568)

- Donated personal 41x Whole Genome Sequencing dataset to the public domain (CC0).
- Executed cloud (Terra.bio) and local Apple Silicon bioinformatic pipelines, producing **high-coverage GRCh38-aligned BAM and VCF files**, Polygenic Risk Score (PRS) calculations, and disease ontology mapping (HPO/MONDO).

CERTIFICATIONS & EDUCATION

- **GALENOS Crowd Training:** Cochrane Crowd & GALENOS Evidence Synthesis Certification (*May 2026*)
- **Career Essentials in Generative AI:** Microsoft & LinkedIn Certification (*Mar 2024*)
- **EF SET English Certificate:** C1 Advanced Professional Proficiency (68/100)
- **Studies in Medicine & Surgery:** Università degli Studi della Campania "Luigi Vanvitelli" (*Enrolled 2020; foundational coursework completed*)
